

Technical Specification Sheet

Woods Stone Pads [WGGR115]

Woods Stone Pads feature a flexible foam lip which creates a seal against irregular stone surfaces for safe lifting.

Woods Stone Pads feature a flexible foam lip which creates a seal against irregular stone surfaces for safe lifting.

Compatible with our range of Woods Powr-Grip vacuum lifters, these stone pads can be used to lift honed, flame-cut and saw-cut stone slabs, insulated metal panels and other textured materials. The foam lip moulds to rough load surfaces so air does not leak from under the pad.

Features

- 254mm diameter
- Sold individually
