

Technical Specification Sheet

## **Woods Coated Glass Pads** [WGGR233]

The Woods Vacuum Pads for Coated Glass are made from a special rubber compound specifically designed for lifting Low-E glass and coated materials.

These high performance vacuum pads can be fitted to any of the lifters in our Woods Powr-Grip range.

These vacuum pads can be attached to the coated side of a load and lift without damaging the surface or leaving any unwanted residue behind. The durable suction pads are also suitable for handling painted or silk screen glass to make sure that surfaces are kept in flawless condition.

### **Features**

- 305mm diameter
- Sold individually
